

RACING PIGEON PRODUCT RANGE

BREEDING FORMULA

Racing Pigeon Breeding is a complete food to support racing pigeons during breeding season. It contains L-carnitine and high levels of antioxidants, like vitamin E and selenium to support reproductive function. It also includes egg, a high quality protein source, in order to assist breeding and crop milk production.

This formula is also indicated for show pigeons and other exotic granivorous pigeons.

MAINTENANCE FORMULA

Racing Pigeon Maintenance is a complete food for racing pigeons during non-breeding and non-competing stages. It is a balanced diet to promote healthy birds. The nutrient balance of this product is optimum for recovery from intense breeding and competing activities and for rest periods.

This formula is also indicated for show pigeons and other exotic granivorous pigeons.

MOULTING FORMULA

Racing Pigeon Moulting is a complete food for racing pigeons formulated to support the birds during the process of moulting. Sulphur amino acids, lysine and methionine, are increased in order to facilitate feather production. Additionally, MSM is added as a source of Sulphur. Sulphur is an essential component of amino acids necessary for the production of collagen and keratin which are essential for the health and maintenance of skin and feathers.

This formula is also indicated for show pigeons and other exotic granivorous pigeons during the process of moulting.

JUNIOR FORMULA

Racing Pigeon Junior is a complete food formulated to support growth and young pigeon development. It contains adequate levels of amino acids like Lys and BCAA for an optimum development of muscle tissue. It also contains MSM which has a positive effect on growth performance and helps support muscle and tendon development.

This formula is also indicated for show pigeons and other exotic granivorous pigeons during growth.

SPORT&TRAINING FORMULA

Racing Pigeon Sport & Training is a complete food formulated to support racing pigeons during the training and racing season. It contains L-carnitine to improve fatty acid combustion efficiency during intense exercise, and it also has a positive impact on recovery after strenuous activity. This formula contains MSM, which helps support muscles and tendons and attenuates post-exercise muscle and joint pain. This formula contains high levels of antioxidants to protect against oxidative stress after exercise.
